PROFILE

BSc Applied Computer Technology graduate (USIU-Africa, September 2026), currently based in Seville, Spain. I build and ship real, production-grade AI tools fast, a style often called vibe coding: using AI-augmented workflows to move from idea to live product in days, not months. At Petplan España I have deployed three live tools under CEO supervision that are already saving the claims team hours of manual work and giving the retention team actionable intelligence for the first time. I work across the full stack (Python, React, Node.js, Flask) and have a strong interest in machine learning, cybersecurity, and scalable product development. Immediately available for remote work or on-site roles anywhere in Europe and beyond.

PROFESSIONAL EXPERIENCE

IT Developer & AI Engineer | Petplan España | Seville, Spain

May 2026 to Date

Contracted directly under CEO supervision to lead digital transformation and AI-powered brand development. Applying vibe coding practices to ship polished, branded, cloud-hosted tools at startup speed.

- **Smart Claims Invoice Reader:** AI tool that extracts claim data (clinic, amount, date, diagnosis, medications) from vet invoices (PDF or photo) in seconds, eliminating manual processing and accelerating claim payouts. Live at lector-facturas-petplan.onrender.com
- **Retention Predictor Panel de Retención:** Machine learning dashboard ranking policies by cancellation risk at renewal, explaining each risk driver (premium increase, autopay status, web activity) so the marketing team can act on at-risk customers before they leave. Live at panel-retencion-petplan.onrender.com
- **Pet Insurance Live Tracker:** Real-time policy and claims monitoring dashboard for public and internal use. Live at pet-insurance-tracker.onrender.com
- **Web Development:** Currently refactoring the company website, improving blog architecture, UX, and front-end performance.
- **All tools:** Follow Petplan España branding standards (logo, colours, header/footer) and run 24/7 on cloud infrastructure.

Work-Study Research Assistant | USIU-Africa | Nairobi, Kenya

2022 to 2025

- Supported faculty research activities and administrative tasks, developing professionalism and academic research skills.

EDUCATION

BSc. Applied Computer Technology

2022 to 2026 (graduated)

USIU-Africa, Nairobi, Kenya

Student Exchange Program

2025

Sciences Po, Reims Campus, France

LIVE PROJECTS

Smart Claims – AI Invoice Reader lector-facturas-petplan.onrender.com

Extracts structured claim data from vet invoices instantly. Python/Flask + AI OCR. Reduces manual processing time and accelerates payouts.

Customer Retention Predictor panel-retencion-petplan.onrender.com

ML dashboard ranking policies by cancellation risk. Built with scikit-learn + React front-end.

Pet Insurance Live Tracker pet-insurance-tracker.onrender.com

Real-time policy and claims monitoring. Full-stack cloud-deployed application.

USIU Online Clearance System

Digitised the end-to-end graduation clearance process for USIU-Africa, replacing a paper-based workflow.

TECHNICAL SKILLS

Approach	Vibe coding: AI-augmented development, rapid prototyping to production-grade deployment
Languages	Python, JavaScript (ES6+), Java, C++, HTML/CSS
Frameworks	React, Node.js, Flask, scikit-learn, pandas
Databases	MySQL, SQLite
Tools & Cloud	Git, GitHub, Render, REST APIs, Figma
AI / ML	Supervised learning, classification models, NLP/OCR pipelines, AI-powered data extraction
Concepts	Data Structures & Algorithms, OOP, RESTful API Design, Cybersecurity fundamentals, Agile
Languages (Human)	English (native/fluent), Swahili (native), Spanish (beginner, actively learning)

CERTIFICATIONS

- ICDL CORE: International Computer Driving Licence, 2022

EXTRACURRICULAR & VOLUNTEERING

- Cybersecurity and digital forensics workshops: hands-on training in penetration testing concepts and incident analysis.
- Volunteer at St. Scholastica Uzima Hospital, Nairobi: community health support and digital literacy assistance.
- Hult Prize 2023 Competitor: pitched a climate-tech innovation solution to an international judging panel.
